

DesignTek1 (DT1) first developed *WebUpdate* in 1996. The solution was discovered through our client's needs to easily maintain and manage the content on their websites. Today, we have version 4.2 to offer to your eBusiness.

- An entirely web-based content management software solution.
- *WebUpdate* solutions are **100% customized** to any content management needs.
- Its **Workflow and Lifecycle** features automatically manage the process of how and when content is released on the website.
- **Decentralize** your content management process and allow **non-technical staff** to maintain control of the site.

NON-TECHNICAL STAFF CAN PUBLISH CONTENT ANYWHERE ON THE WEBSITE

the power of managing
content
as easy as **123**

WebUpdate can manage any type of content. And most importantly content is always dynamic. Whether you need to manage press releases, newsletters, career announcements, products catalogs, or corporate information, there is a solution. This is accomplished through the *WebUpdate OpenArchitecture*.

WebUpdate can help streamline any ePublishing process, while reducing bottlenecks and lowering costs.

Let us show you what *WebUpdate* can do for your eBusiness needs.
